Colbert, WA 99005

**RE: Project Status Report: Technical Assistance to Colbert Landfill Contaminate Area Committee, PN 256243**

Dear (b) (6)

This letter is a report on the status of our current project work as of August 20, 1993 for technical assistance to the Colbert Landfill Contaminate Area Committee.

**Work Performed to Date** (July 21-August 20, 1993)

Work during this billing period consisted of less than one hour of project management related to the monthly update and billing review, and submission of a copy of our initial Report for the CLCAC to Spokane County. This time will be held until the next billing period.

**Work In Progress**

We are currently waiting for a response from Spokane County to the questions and concerns submitted by the CLCAC. When the County does respond, a meeting with the County is anticipated. Until that occurs, there is no work in progress.

**Budget Analysis through August 20, 1993**

Contract Amount	Spent to Date	% Completion
\$39,500.00	\$28,933.37	73.2%

Thank you for the opportunity to serve the CLCAC. If you have any questions or comments about this update or our current work on this project, please call me at (509) 921-0290.

Very truly yours,  
**CASCADE EARTH SCIENCES, LTD.**
